Doormat Plate Anti-Slip Products

Features and Benefits of No Skidding Doormat Plate Anti-Slip Products:

- Reduces slips on steps, railway ties, walkways, wooden decks, marine applications, bridges, etc.
- Used in both indoor and outdoor applications.
- Suitable for concrete, wood, brick, stone and metal.
- Available in a variety of sizes.
- Can be fixed permanently with screws or adhesive.
- Suitable for outdoor environments where anti-slip tapes can't be applied because of winter weather constraints.
- An even more cost effective option to our Step Covers when a nose is not required.
- Resistant to salt and salt water.
- Superior gritted anti-slip surface available in coarse, medium and fine textures.
- Quick and easy installation in all weather conditions.
- Can be walked on immediately with minimal lost time and work stoppages.
- Suitable for concrete, wood, brick, stone and metal interior and exterior applications.
- Easy to install - can be screwed into place or glued into place with a urethane / polyurethane adhesive.
- Can be installed onto grating using our grating clip kit.
- Can be installed even in winter months using screws.
- Available in black or yellow and also black with yellow safety stripe for our flat plates and step covers.
- Our anti-slip step covers, plates, treads and walkway panels provide slip-resistance and durability on surfaces such as inclines, ramps, and stairs.
- Lightweight and ideal for use on structurally sound flooring and steps.
